REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance: The prior art does not disclose or adequately suggest the instantly claimed apparatus for supporting and retaining particulate material in a radial flow vessel, wherein, in particular, the apparatus comprises a ring of separate hollow conduit members, said conduit members each having an internal cross-sectional area defined by a pair of radially extending side wall portions and a concave shaped inner wall portion integrally joined to each of the radially extending side wall portions, said radially extending side wall portions on at least some of the conduit members being angled away from each other in a generally radially outward direction but at an included angle which is less than if they were truly radial relative to the axis of the vessel. In addition, the prior art does not disclose or adequately suggest the instantly claimed apparatus for supporting and retaining particulate material in a radial flow vessel, wherein, in particular, the apparatus comprises a ring of separate hollow conduit members, said conduit members each having an internal cross-sectional area defined by a pair of radially extending side wall portions and an inner wall portion integrally joined to each of the radially extending side wall portions, said radially extending side wall portions on at least some of the conduit members being angled away from each other in a generally radially outward direction but at an included angle which is less than if they were truly radial relative to the axis of the vessel, and wherein adjacent conduit members have their pairs of generally radially extending side wall portions at different included angles.
